- Teamwork.

PERSONAL PROJECTS

🔗 Smarteen-Card(2024-25)

- Developed a smart card system targeted at teenagers (ages 14–18) for secure online transactions using RFID technology.
- Implemented RFID-based payment functionality allowing card usage through scanners or key-based access.
- Designed a dual-access control system enabling both parents and teens to manage card activities.
- Built a parent portal with features such as card recharge, transaction history tracking, and activity monitoring.
- Enabled admin-driven card issuance based on parent requests, ensuring controlled access and usability.

OTHER PROJECTS

🔗 NiviaSport Clone

(July-2025)

- Developed a multi-page sports eCommerce website titled “**NiviaSport Clone**” using HTML and CSS.
- The project includes dedicated pages for various sports categories such as Football, Basketball, Badminton, Volleyball, and Turf. Implemented clean layout structures, consistent styling, and user-friendly navigation to simulate a real-world sports brand website. Focused on semantic HTML and modular CSS to ensure maintainability across devices.
- This project demonstrates strong front-end development skills and attention to user experience.
