PERSONAL PROJECTS

Smarteen-Card(2024-25)

- Developed a smart card system targeted at teenagers (ages 14-18) for secure online transactions using RFID technology.
- Implemented RFID-based payment functionality allowing card usage through scanners or key-based access.
- Designed a dual-access control system enabling both parents and teens to manage card activities.
- Built a parent portal with features such as card recharge, transaction history tracking, and activity monitoring.
- Enabled admin-driven card issuance based on parent requests, ensuring controlled access and usability.
